# Avante Mining Corp.

### COMPANY HIGHLIGHTS

Three Targeted Commodities include Nickel, Copper, and Gold

- Voisey's West & Voisey's Northwest Projects Nickel is a key element in Lithium-Ion bat-
- teries giving the ability for long life and is essential for greater power and energy density. LMSL (Cu) Project - Copper is classified as a critical element and is needed in every
- alternative energy technology. Blackdome (Au) Project - Gold provides a hedge against inflation and provides a strategic
- investment opportunity.

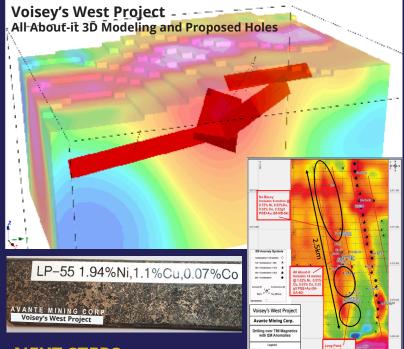

### **Potential for Growth**

- The Voisey's West & Northwest Projects are located 50 km from Vale's Voisey's Bay mine, and shows a nickel discovery outcropping at surface ready to be expanded.
- The LMSL Copper Project hosts a ~70 million tonne historic tonnage estimate which outlines a copper porphyry system near-surface that is targeted to improve at depth.
- The Blackdome Project is positioned to be a brand-new gold discovery in BC with only surface work completed to-date returning up to 54 g/t gold.

#### Strong Technical Team with Track Record of New Discoveries

- Technical team collectively has over 90 years of development and mining experience, behind two recent porphyry discoveries in BC, and have developed and expanded resources at multiple projects.

### NEXT STEPS

#### Voisev's West

- The most recent drilling on the project in 2008 produced the highest grades and longest intervals to-date, these have not been followed up on.
- Nickel has seen a significant increase in price and demand since the previous work was completed.
- 2023 planned drilling program will test mineralized zones along strike and to depth.

### **VOISEY'S WEST PROJECT**

- Nickel, Copper, and Cobalt mineralization have been intersected in drilling. Including 14 meters at 1.02% Nickel, 0.51% Copper plus Cobalt and PGE's.
- Located 50 km northwest of Voisey's Bay Nickel-Copper-Cobalt mine in Newfoundland & Labrador, Canada which was sold for 4.3 billion in 1996.
- Major infrastructure has been developed in the region as a result of the Voisey's Bay mine, including a purpose-built port.
- Similar geology to the Voisey's Bay deposit, where the project's geology shows indications that a deeper seeded mafic-intrusive body may contain additional pooled nickel sulphides.
- 2.5 km strike identified with surface mineralization that has yet to be defined by drilling.

### **VOISEY'S NORTHWEST PROJECT**

Second nickel project 10 km north of TL Nickel main zones.

- Nickel, Copper, present in surface sampling, never drill tested.
- Mineralization consists of pyrrhotite, pentlandite and chalcopyrite.
- Excellent potential to locate large volume of mineralization adjacent to intrusions.
- Geophysical EM anomalies coincident with elevated nickel, and extend under cover.

#### Voisey's Northwest

- Target areas are on trend with the Voisey's West projects zones also features similar geological setting to Voisey's Bay Mine.
- Follow up work to include channel sampling/trenching and drilling as determined by early ground work planned for the 2023 field season.

# **WINTER 2024**

British Columbia, Canada

### **BLACKDOME PROJECT (Au)**

- Drill Ready gold-silver epithermal veins exposed in outcrop across large area, never drill tested.
- Potential new discovery of near surface, high-grade gold system.
- High grades encountered up to 54 g/t gold at surface with footprint over 1 x 2 kilometres.

### LMSL PROJECT (Cu)

- In BC's premier copper porphyry & gold mining district, with a controlling regional scale land package.
- Located next to the Highland Valley copper mine (Teck), and on trend with the New Afton mine (New Gold), and Copper Mountain mine (Copper Mountain Mining).
- Confirmed porphyry occurrence with **70 million tonne historic copper estimate**, open at depth.
- **Permitted & Drill ready**, new and confirmed targets verified independently by Artificial Intelligence (AI) analysis.

### **KEY TEAM MEMBERS**

#### Adrian Smith, P.Geo | CEO and Director

Over 15 years of experience in the mining and exploration industry.

29

Cu

Coppe: 63.546

- Behind two recent porphyry discoveries in BC and several resource expansion projects.
- Has been responsible for raising millions of dollars in equity financing.
  Bachelor of Science degree specializing in Geology from Simon Fraser University.

#### Jim Hennigh | CFO

- A chartered accountant (CA,CBV, CFA) chartered business valuator and a CFA charterholder, Jim founded CorpFinance in 1984.
- Previous Tax and Business Valuation Manager at Touche Ross & Co.
- Jim has solid expertise and practical experience in valuating businesses in a broad range of industries.
- He has assisted companies in financing, public offerings, and restructuring. Areas of expertise include manufacturing, telecommunications, software, biomedical, oil and service industries.

#### Collin Kim | Director

- 30+ years of experience in the petrochemical, coal and mineral industries. Involved in various mineral projects bringing together Canadian and major Korean State-Owned Firms.
- Worked for Hanwha Corp., one of Korean business conglomerates for 16 years including 5 years in Jakarta, Indonesia as a Chief Representative of Hanwha's Jakarta office and was dedicated to trading.

#### Mike Collins | Independent Director

- Professional Geologist (P.Geo.) and CEO of Exploits Discovery Corp. (NFLD.V).
- 25+ years of industry experience with a deep understanding of numerous mineral camps and deposit types around the world. Including, over 14 years of experience as an officer and director of public companies.
- Experience of building corporate structure, marketing and value accretion bringing significant value to the Avante team.

#### Kosta Tsoutsis | Director

- Brings over 20 years of finance and capital market experience.
- Former investment advisor at Mackie Research, Jordan Capital Markets, and Canaccord Capital Corp.
- Has been responsible for raising tens of millions of dollars in equity financing.
- Significant experience specializing in developing, restructuring and financing venture capital companies.

#### James Turner | Technical Advisor

- 45+ years of industry experience with companies such as Cominco and Newmont Gold.
- Formed private consultancy, TerraSat Geomatics Inc. and worked with several junior mining issuers around the world.
- In addition to assisting AVA, Jim is advising on a gold project in South Africa, copper deposits in Namibia and BC, and tailings deposits in Nova Scotia, Oregon, Peru, and Costa Rica.

### **CAPITAL STRUCTURE**

Year High:	Year Low:
CAD \$0.21	CAD \$0.08
